Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 1, 2, 7-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ban et al. (6,039,007) in view of Sanger (5,683,031). Ban et al. discloses all of the limitations of the claim(s) except for the pump wheel being arranged in the cooling chamber. Sanger discloses the presence of a pump wheel being arranged in the cooling chamber. See fig. 1 and 90. Hence, one skilled in the art would find it obvious to modify the system of Ban et al. to include the pump wheel being arranged in the cooling chamber of Sanger for the purpose of space conservation. Regarding claim 2, see 15. Regarding claim 10, see 6c.

Claim(s) 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ban et al. in view of Sanger and in further view of Perhats (4,308,994). Ban et al. in view of Sanger discloses all of the limitations of the claim(s) except for the pump being magnetically driven. Perhats discloses the presence of a magnetically driven pump. See fig. 3, and 22. Hence, one skilled in the art would find it obvious to modify the system of Ban et al. in view of Sanger to include a magnetically driven pump of Perhats for the purpose of energy conservation. Regarding claim 4, see 23.

Art Unit: 3749

Allowable Subject Matter

Claim 6 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Derek S. Boles at (571) 272-4872.
